About Corvalis Digital Hub

Corvalis Digital Hub is a registered technology and digital solutions company based in Kenya, founded and led by full-stack developer Martin Mutiso Mwazia. We design and build modern, high-performance websites, mobile applications, and digital products for businesses and individuals looking to grow online.

Our work is built on a modern, reliable technology stack — including React, TypeScript, Next.js, Tailwind CSS, Firebase, Clerk, Neon, and Supabase allowing us to deliver solutions that are fast, scalable, and easy to maintain. Beyond development, we support clients end-to-end: from domain and hosting setup, to publishing on the Google Play Store and Amazon KDP, to ongoing maintenance once a project is live.

Whether you're a solo entrepreneur launching your first website or a growing business that needs a custom application, Corvalis Digital Hub delivers professional, dependable digital solutions tailored to your goals and budget.

Website Development

Package	What's Included	Price (USD)
